

## CHAPTER V

### CONCLUSION AND SUGGESTION

This chapter presented the conclusion and suggestion of this research. The conclusion was built by the researcher by using research data result in the several form such as interview, observation, documentation and arranged from the research question. The suggestion part is presented in order to giving several ideas to English teacher and students that related with enhance teaching and learning process.

#### A. Conclusion

Based on the research findings, the researcher creates several conclusions, as follows.

#### 1. **The Most Accessed Instagram Accounts and Contents by Students to Enhance Listening Skills at SMA 1 Gebog Kudus.**

##### a. **Instagram accounts that mostly accessed by students of SMA 1 Gebog to enhance their listening skills.**

Most of students that interviewed showing their interest into an artist, gamers, singer, celebrity, idol, educator and several of them are foreigners. In other side, one of students also following some public figures or influencers but not a foreigners, just local influencers or public figures. The accounts that followed by the students that related with English such as Selena Gomez, Mobazens, Aaron English, and others, makes the students interact with English through their activity in Instagram. Some students obtained new knowledge and even as a source about listening when interacting with several accounts and contents.

##### b. **Instagram contents that mostly accessed by students of SMA 1 Gebog to enhance their listening skills.**

The contents that mostly accessed by interviewed students most of them are videos and pictures contents from reels and story features. The contents that mostly accessed by the students are

following their interest such as contents about sports, music, games, and education. It means the contents especially videos or pictures with any kind of themes such song from Selena Gomez, games from Mobazens, Education from Aaron English, and so on, become the content that makes students' listening skill develop. The kinds of content that mostly students access to enhance their listening skill depend on the students' interest. They will access to any contents as long as they are related with English especially listening.

**2. The Students' Perception in Using Social Media Instagram Contents to Enhance Their Listening Skills.**

The students' perception about Instagram content to enhance their listening skills is quite positive. Some students are ever using Instagram content as their listening media and the rest, even they have not yet used Instagram as their listening learning media. They agree if Instagram is used as a media in listening learning. All of the students obtained new knowledge about English in Instagram such vocabularies and pronunciation. This means, that the students have good perception about the use of Instagram especially for enhancing listening skills.

**3. The Benefits and Drawbacks of Using Instagram as Media to Enhance Students' listening skills.**

**a. The benefits of using Instagram as media to enhance students' listening skill.**

The students is interested with Instagram as their listening media because besides of its simplicity, Instagram can be used out of learning activity in school, and provides several interesting features or contents that can freely access by the users. The teacher also stated that Instagram is a beneficial application especially when using it as listening learning media. This means, that Instagram is quite beneficial as listening learning media regard to the students and teachers feedback.

**b. The drawbacks of using Instagram as media to enhance students' listening skills.**

The main drawback of the Instagram is the global content. The students and the teacher have stated the same issue which is the content is global so the users need to filter the contents. In addition, pronunciation and subtitles issues also stated by the students because most of English content are from native speaker which the accents or speed when they talk is fast makes some students hard to understand.

**B. Suggestion**

The suggestion is presented based on the research finding in chapter four, considering the teacher, students, and researcher.

**1. For English Teacher**

The researcher suggests the teacher to always trying developing the teaching methods by collaborating tools around us. Collaborating technology such as social media is one of the best ways to create new and futuristic teaching and learning environment because remembering that technology is always develop. Creating new method in teaching and learning there's need a several requirements which includes the students and teachers roles, so always paying attention to students behavior such as stay control the students activity is a must in learning environment especially when using social media. The teacher can using several listening comprehension and event, then collaborate it with the most suitable social media such as Youtube, Facebook, Whatsapp, and others especially Instagram. Creating interesting and suitable material by take a scope and observe the students interest or behavior also one of strategy especially in using social media especially Instagram. Being well-prepared is an indicator as educator to provide best teaching and learning environment.

## 2. For the Students

The students must carefully when learning through social media, remembering that social media is global, the students must being wise when using it. Always practicing beside theory, create a good environment in social media such interact more with something related with English, paying attention to teacher instruction are a great behavior and never forget using other resources such as learning books beside using social media especially Instagram. Manage the time using is also important because spending too much time using social media by using smartphone or other devices will affect your healthy especially for eyes. The student can trying to create they own learning style when using social media as long as it's suitable and not caused bad effect.

## 3. For the Researcher

This research is still a flaw, so there's still need a further research or study that related with this topic in order to creating a perfect result, hopefully there will be another study more deeply next research.
