Naili Izah, 2020310101, The Effect of Financial Ratio Analysis (EPS, DER, and ROE) on Stock Prices (ISSI Health Sector Case Study) 2018-2022 Period.

Share prices are important for companies because they reflect the company's value. Share prices can change due to the influence of various factors, including: Earning Per Share (EPS), Dept to Equity Ratio (DER), and Return on Equity (ROE). This research aims to determine the effect of Earning Per Share (EPS), Dept to Equity Ratio (DER), and Return on Equity (ROE) on stock prices. This research was conducted on health sector companies listed on the Indonesia Sharia Stock Index (ISSI) during the 2018-2022 period. The number of samples used in this research was 11 companies using purposive sampling method. The analysis technique used is panel data regression analysis technique, and processed using Eviews 10 software. The results of the analysis in this study show that EPS has an effect on stock prices, DER has no effect on stock prices and ROE has an effect on stock prices. For investors who want to invest, it is recommended to look more clearly at EPS, DER and ROE in companies that have been determined to predict share prices, so that investors have the right time to invest.

Keywords: *Earning Per Share (EPS), Dept to Equity Ratio (DER), Return on Equity (ROE), and Share Price.*
