

CHAPTER V

CONCLUSION AND RECOMMENDATION

A. Conclusion

After getting the results of this research relating to enhancing student learning motivation in learning English through English songs for elementary school students, the researcher has made conclusions related to the objectives of this research.

1. In MI NU MU, the song was implemented as the learning media in English teaching and learning. This aimed at enhancing students learning motivation and boosting student enthusiasm in elementary school, especially in the English teaching and learning process. The teacher as the learning manager selected songs that are appropriate to the material, then deliver the material and evaluate the student's learning process in using songs as a learning medium.
2. In using English songs to increase student motivation, there were benefits and drawbacks:
 - a. The Benefit of Using English Songs
 - Enhancing Students' Motivation in Learning English
 - Effective Ways to Learning English
 - Improving Students' English Skills
 - Increasing Students' Interest in Learning English
 - Increasing Students' Vocabulary Mastery
 - b. The Drawback of Using English Song
 - Differences in Students' Learning Motivation and Abilities
 - Students' Difficulties in Pronunciation and Writing Skills
 - Inappropriate Placement and Limited English Learning Hours

B. Recommendation for Future Study

Based on the findings and discussion of this research, the researcher would like to offer some recommendations for people involved regarding enhancing student learning motivation in learning English through English songs for elementary school students.

1. For School Administrators

It is expected that schools may better assist English teachers in the process of teaching and learning by offering seminars to help them prepare classes. To do all of this, sufficient facilities are required to ensure that the teaching and learning process runs effectively.
2. For Teacher

It is projected that English teachers are going to keep innovating in the use of attractive learning media to boost students' enthusiasm to

study English, particularly their communication abilities. Then, to support this, it is intended that teachers will employ technology as well, given that everything can now be simply and rapidly accessed through technology.

3. For the Researcher in The Future

It is expected that future researchers will always innovate in the research they conduct, taking advantage of what is available to them at home, school, university, and in the community.
